

JAMEEL ABBAS

Front-End Web Developer

Email: jameelabbas2022@gmail.com | Location: Post Office Ghorokhor, Alchori, Shigar | GitHub: github.com/JameelShabbir

About Me

I am a passionate Front-End Web Developer with strong experience in building responsive, user-centric applications using React.js, HTML, CSS, and JavaScript. I aim to contribute effectively to dynamic tech teams by writing clean, maintainable code that enhances user experience and performance.

Experience

E-commerce Web (2021-2022)

Developed a dynamic e-commerce web application using React. Integrated RESTful APIs and Firebase for seamless backend operations. Emphasized responsive design and modern tech practices.

Forum Website (2021)

Planned and implemented a forum website using PHP and MySQL. Utilized Stack Overflow-style features with a custom CMS and login system.

Artificial Intelligence, Deep Learning (2023)

Completed coursework in AI and ML with projects using Python. Built basic machine learning models for classification tasks.

Selected Projects

Point of Sale (POS) Web App

React.js | .NET Core | Entity Framework | Firebase

Developed a full-stack POS system with category and table modules using layered architecture and real-time updates.
