OBJECTIVE

Aspiring Master's student seeking supervision in Robotics & Intelligent Automation under the Chinese Government Scholarship (CSC). Strong background in computer vision, image processing, and full-stack development; motivated to contribute to research in robotic perception and autonomous systems.

EDUCATION

BS (Hons) Computer Science University of Baltistan, Skardu (Dec 2025)

- Relevant courses: Computer Vision, Image Processing, Machine Learning, Algorithms, Networks
- Current CGPA: (2.9)

Intermediate (F.Sc) — Inter College Shigar — 2021

Matriculation — Government Higher Secondary School — 2018

RESEARCH & PROJECTS

Monkeypox Detection using Image Processing — (Course/Personal Project)

- Developed a CNN-based classifier to detect skin lesion images; applied preprocessing, augmentation, transfer learning.
- Tools: Python, PyTorch/TensorFlow, OpenCV.

Handwritten Digit Recognition — Image Processing Course Project

- Implemented digit recognition using CNN; achieved (insert accuracy if available).
- Tools: Python, Keras/TensorFlow.

POS Tables Management / Dishes Module — Full-Stack Project (Work)

- Designed backend endpoints, Entity Framework, AutoMapper; front-end in React.
- Implemented features for orders, variants, and shift tracking.

Other: Small Flutter apps, Dev work in .NET and React, multiple mini projects on GitHub.

TECHNICAL SKILLS

- Programming: Python, C#, JavaScript (React), Dart (Flutter)
 - ML / CV Tools: PyTorch, TensorFlow, OpenCV, scikit-learn
 - Backend: .NET Core, Entity Framework, REST APIs
 - Databases: SQL Server, SQLite
 - DevOps / Tools: Git, Docker (basic), VS Code, Visual Studio
-
