

JAMEEL ABBAS

FULL STACK WEB DEVELOPER

• Abyssinia Lines Karachi • 03554658551
• jameelabbas2022@gmail.com • <https://jameelabbas.netlify.app>

SUMMARY

Full-Stack Developer experienced in delivering complete software solutions from backend APIs to modern frontend dashboards. I build applications using .NET Core, React.js, and Supabase, and have worked on real-world modules such as POS systems, ERP workflows, and booking systems. I focus on writing clean, maintainable code, optimizing performance, and turning business requirements into reliable features that improve efficiency.

WORK EXPERIENCE

Full-Stack Web Developer – Cross Solution

Apr, 2023 – Present

- Led development of multiple full-stack applications using .NET Core, Entity Framework, AutoMapper, React.js, Flutter, Supabase, and Deno for startup and business clients.
- Delivered and optimized POS modules, including Tables Management, Category Module, Order Service, Price Variants, and Shift Tracking, improving operational workflows by up to 30%.
- Designed and implemented RESTful API architectures following clean architecture & layered design, improving maintainability and scalability.
- Conducted data modeling and analysis to support feature decisions, improving system performance and reducing redundancy.
- Integrated Supabase for real-time updates, authentication, and cloud storage in various projects.
- Managed deployments, testing, and debugging in both development and production environments.
- Prepared documentation, architecture diagrams, and user guides for clients and university projects.

JUNIOR DEVELOPER

Apr, 2022 – August, 2023

- Worked on multiple academic and freelance projects involving backend logic, UI design, and database structures.
- Gained practical skills in problem-solving, requirement analysis, and feature implementation.

EDUCATION

BS Computer Science, University of Baltistan, Skardu

2022 – 2025

- Graduated

F.Sc ICS, Degree College Skardu

2020 – 2022

- Shigar, Gilgit-Baltistan

Matric Science, Gov High School Alchori

2018 – 2020

- Shigar, Gilgit-Baltistan

CERTIFICATIONS

AI & Machine Learning | GBIT in Collaboration with NUST

2023 – 2024

6-Month Certified Course

Hands-on training in ML pipelines, image processing, datasets, classification models, deployment, and evaluation metrics.

Used practical ML techniques for disease detection, computer vision, and decision automation.

Business English Communication & Employability Skills By US Embassy

2019 – 2020

Honored to complete a rigorous 260-hour course sponsored and certified by the U.S. Embassy.

Curriculum advanced proficiency in professional Business English, enhancing capabilities in client communication, report writing, and professional etiquette.

PROJECTS

Tourism Platform for Gilgit-Baltistan

April 2025

A full-stack tourism ecosystem with hotel booking, POS for restaurants, travel recommendations, online payments, and user dashboards.

Designed complete architecture with React.js, .NET Core, PostgreSQL/Supabase.

Included micro-frontend design for separate app modules.

REFERENCE:<https://valhallatravel.netlify.app>

Hotel Management System

Aug 2024

Built using Clean Architecture, including booking engine, room management, user roles, dashboards, and offline support with PWA.

Optimized database queries and improved UI/UX with shadcn UI + React.

Monkeypox Detection System

April 2024

Image-processing research-based project using ML classification algorithms.

Implemented dataset preprocessing, augmentation, feature extraction, and accuracy evaluation.

POS Modules

Aug 2025

Created POS modules with robust entity relationships using Entity Framework, repository pattern, and services layer.

Shift management tracked profits/losses and improved restaurant operations.

SKILLS

Technical Skills

Backend: .NET Core, EF Core, AutoMapper, REST API, Node.js, Deno, PHP

Frontend: JavaScript ES6, React.js, Shadcn UI, Tailwind CSS, Bootstrap-5

Database: PostgreSQL, Supabase, SQL Server, MySQL

AI/ML: NumPy, Pandas, OpenCV, CNN, RNN, concepts, model training & evaluation

Architecture: Clean Architecture, Micro-Frontend, Repository Pattern, MVC

Tools: Git, GitHub, Postman, Figma, Visual Studio Code
