LETTER OF RECOMMENDATION

It is with great pleasure that I write this letter of recommendation for Mr. JAMEEL ABBAS, s/o SHABBIR HUSSAIN, who was a regular student of the BS Computer Science (BSCS) degree program under registration number S22BSCS100 at the Department of Computer Science, University of Baltistan, Skardu.

He has demonstrated exceptional academic performance and has a deep understanding of Artificial Intelligence (AI), particularly in the domain of Computer Vision and Deep learning. During his time under my supervision, he successfully completed a project focused on developing a Monkeypox disease detection or prediction system, a highly valuable initiative for promoting the healthcare sector. His ability to address complex technical challenges using modern AI techniques showcases both his strong technical skills and creative mindset.

In addition, he has strong communication skills and a humble personality, making him well-respected by both peers and faculty through his active participation in seminars and discussions.

I am confident that he will make meaningful contributions to any institution he becomes a part of, whether in academia or industry. He has the vision, skills, and determination required to thrive in today's competitive technological landscape. I strongly recommend him for further studies or professional opportunities, and I am sure he will exceed expectations.

Please feel free to contact me should you require any additional information.

Hasin Bano

Instructor, Department of Computer Science
